CO₂-integration

.....

C. Otto Gehrckens GmbH & Co. KG
has reduced CO₂ emissions
in the amount of 816 tons
in 2026.

.....

In our certified projects, CO₂ emissions are offset through reforestation and the protection of rainforests. Trees store water, protect the soil, and provide habitats for animals and plants. In this way, a measurable and sustainable impact is created for climate protection, biodiversity, and improved livelihoods for local communities.

Your contribution helps the future grow!

Dr. forest. Henriette Lachenit
Vorstandsvorsitzende
